

# Call for feedback on TEG report on EU Taxonomy

Fields marked with \* are mandatory.

## Introduction

---

### Disclaimer:

This call for feedback is part of ongoing work by Directorate-general for financial stability, financial services and capital markets union, Directorate-general for environment, Directorate-general for climate action and Directorate-general for energy on sustainable finance, for which the European Commission has set up a [dedicated Technical expert group \(TEG\)](#).

This feedback process is not an official Commission consultation or document nor an official Commission position. Nothing in this feedback process commits the Commission nor does it preclude any policy outcomes.

In March 2018 the European Commission published its [action plan: financing sustainable growth](#). Action 1 of the Commission's action plan calls for the establishment of an EU classification system for sustainable activities, or Taxonomy. The European Commission followed through on this action in May 2018 with a [proposal for a regulation on the establishment of a framework to facilitate sustainable investment](#) (taxonomy regulation).

In addition, a [technical expert group on sustainable finance \(TEG\)](#) was set up by the European Commission in July 2018 to assist in with the implementation of four key actions of the action plan, including the development of an EU taxonomy.

Within the framework of the proposed taxonomy regulation, the TEG has been asked to develop recommendations for technical screening criteria for economic activities that can make a substantial

contribution to climate change mitigation or adaptation, while avoiding significant harm to the four other environmental objectives:

1. sustainable use and protection of water and marine resources;
2. transition to a circular economy, waste prevention and recycling;
3. pollution prevention control; and (4) protection of healthy ecosystems.

On 18 June 2019, the TEG published its [technical report on EU taxonomy](#). The report sets out the basis for a future EU taxonomy in legislation. The report contains:

- technical screening criteria for 67 activities across 8 sectors that can make a substantial contribution to **climate change mitigation**;
- a methodology and worked examples for evaluating substantial contribution to **climate change adaptation**;
- guidance and case studies for **investors preparing to use the taxonomy**.

This report builds on the [work that the TEG published in December last year](#) together with a call for feedback on the proposed criteria for these “first round” activities. The TEG has also engaged with over 150 additional experts in the past months to develop technical screening criteria for the ‘second round’ of climate change mitigation activities and climate change adaptation activities.

In addition to its technical report, the TEG has also published a [supplementary report on using the taxonomy](#). This provides investors and companies with a concise and clear explanation of why the taxonomy is needed, what it looks like, and its ease of use.

### **Call for feedback**

The TEG is inviting stakeholders to provide feedback on (parts of) its technical report through the online [questionnaire](#).

**The deadline for providing feedback is Friday 13 September close of business.**

In the online questionnaire, you will be able to select on which parts of the report you want to provide feedback to, including a selection of the 67 individual activities that make a substantial contribution to climate change mitigation and the different elements of each activity.

### **Next steps**

The TEG mandate has been extended until the end of this year. The TEG will use this time to:

- assess the feedback from stakeholders on its technical report;;
- refine and further develop some incomplete aspects of the proposed technical screening criteria for substantial contributions and avoidance of significant harm;
- develop further guidance on implementation and use of the taxonomy.

At the end of its mandate, the TEG will make further recommendations to the European Commission on the need to adjust and complement their work on an EU taxonomy.

The TEG's recommendations are designed to support the European Commission in the development of future delegated acts, as proposed in the taxonomy regulation.

---

**Please note:** In order to ensure a fair and transparent feedback process **only responses received through our online questionnaire will be taken into account** and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact [ec-teg-sf@ec.europa.eu](mailto:ec-teg-sf@ec.europa.eu).
